Dear Tom Crook, Neil Hunter, Paul West, and to whomever it may concern,

I am applying to be considered as a student within the Algonquin College Animation Program Fall Semester 2024: my name is Danielle Danish, and I am coming from the Fall semester of the Algonquin College Drawing Foundations For Animation & Illustration course at the campus. I believe that my current course has given me the skills necessary to apply to Algonquin's renowned Animation program, which I hope to get into to further the strengths I do have and to eliminate the weaknesses which I may possess within the medium as a result of the purportedly challenging but enlightening program. I believe that I may succeed in your program due to the fundamentals taught to me, along with my willingness to heed feedback from my mentors and peers.

When it comes to animation, for me, it is the spice that everything else within the medium of Art lacks. Movement draws your eye and leads you to believe that the unreal has life: it is engaging and breathtaking to see an animated character speak and gesture and endear themselves to you purely through moving frames. I want to be part of the teams that produce the most meaningful environments, characters, and scenes I see in the Art I consume. I'd love to be a member of the process which has produced some of the most dynamic and memorable things in my memory. I want to be able to adapt those still images in my head into a form where it is lively. I want others to work with me to make a final product that others can sit down and enjoy, whether to gaze upon or play with.

I look forward to continuing my education at the college and the development of my art and sincerely wish that I may do so with you. I'm grateful to have the chance to try for a position within the program and am thankful for your consideration to have a look at my fledgling portfolio.

Thank you for your time,

Danielle Danish
